

Case Study

More than just a tick.

Overview

Teakle Composites develops and manufacture high strength, light weight and corrosion resistant fibre composite products (carbon fibre and glass fibre) for mining, drilling, industrial, aerospace and R&D applications.

As leaders in the development of composite structures, Teakle has successfully developed products for its valued clients from special-purpose borehole liners in service hundreds of metres underground to a large lightweight rocket nosecones that protect a multi-million dollar experiment travelling at 10,000 km/h.

What Standards/Regulations of Compliance

Teakle Composites took on the task of Quality Management System implementation and certification. Teakle also design to numerous standards as requested by clients, including – but not limited to – BS 7159:1989, API 5B, API 15LR and API 15HR, although they are not certified to these standards.

How were Southpac Certifications ‘more than just a tick’?

“We had previously been advised that ISO certification was only for large companies, that we would need to create a full-time quality position which would reduce our competitiveness and that it was inflexible and ruin our agility as a supplier. Southpac Certifications took the time to understand our small business and helped us create a system that was intuitive, simple and measurably improved our products, services and the business.”

Want your organisation’s certification to be more than just a tick?

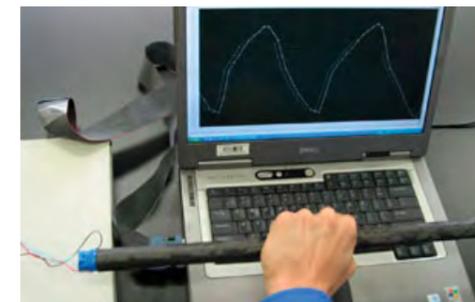

Southpac Certifications is committed to helping organisations get the most benefit from their certification; from the initial stage one audit, throughout the year and for each ongoing surveillance audit, we’re with you.

The Result

“Not being a bureaucratic person, I was apprehensive about becoming ISO standards certified, but our customers indicated it would make it easier for them to purchase from us.

By the end of the process I was satisfied that we had a system that was not only common-sense but rigorous, and which not only provided comfort to our customers but measurably improved the way we operated. Southpac provided excellent value for money with staff who were both knowledgeable and pleasant to work with.”

Philip Teakle
Managing Director,
Teakle Composites

“I recommend Southpac Certifications to any business seeking to establish, maintain or improve its standards compliance.”
